

JunubLink AI - README

JunubLink AI

A WhatsApp assistant for students and small traders in Juba, South Sudan.
Works in English, Arabic and Juba Arabic (Juba Arabic wording is reviewed by local speakers).

What it does

- Verified jobs, scholarships, grants and workshops
- Market prices reported by traders
- "Is this offer real?" scam check
- Topic explanations in simple language

Run it

```
pip install -r requirements.txt
python junublink.py          # test in the terminal
python junublink.py --serve  # WhatsApp webhook (Twilio)
```

Set ANTHROPIC_API_KEY as an environment variable to turn on the explain feature.
Never put keys in the code or upload them to GitHub.

Status

Early prototype. Listings and prices must be added and verified before real use.
